Vegetable Gardening for Beginners: The Basics of Planting ... Pick the Right Location. Picking a good location for your garden is absolutely key. A sub-par location can result in sub-par veggies! Here are a few tips for choosing a good site: Plant in a sunny location. Most vegetables need at least 6 hours of direct sunlight per day. Beginner Vegetable Garden | Better Homes & Gardens Full sun. Plant your raised bed vegetable garden in a place you know is exposed to light most of the day. Editor's tip: If you don't have a spot in full sun, you can still grow leafy vegetables like lettuce and spinach. And if you're in a hot-summer climate, cool-season varieties such as peas may do better in part shade. Planting a Garden Articles | Old Farmer's Almanac Planting a Garden Articles . How to Plant a Garden: 10 Steps (with Pictures) - wikiHow Part 2 Planting the Garden. If you have too many rocks in the soil, consider building a screen to sift out large rocks. Build a wooden frame to support a square of hardware cloth. After you have broken up the soil, shovel it onto the screen and work the soil through it. Large rocks will be left on top of the screen. How to Plant Your First Garden (with Pictures) - wikiHow Instead of planting your garden directly in the earth, youâ€™ll plant in the raised bed. The beds can be of any size, but are typically 3 or 4 feet (0.91 or 1.22 m) wide and 12 inches (30 cm) high. Fill your raised beds with gardening soil obtained from your local farm and garden shop. Planting a Fall Garden â€™ Veggie Gardening Tips Preparing the Garden Beds for Fall Growing. Fall vegetable plants and leafy greens are more tolerant of this source of fresh nitrogen and wonâ€™t suffer with the problems that would be created for other vegetables like overly lush growth in tomato plants. The raised beds enriched with the mushroom soil will fertilize the fall vegetables.

Vegetable Gardening Basics, How to Plant and Grow a ... Planning your vegetable garden. The soil should be very fertile and well draining so that water never puddles after a rain storm. While good air movement around a garden is important, windy areas should be avoided because winds can dry out or break plants. Choose a spot close to a water supply for convenience.
